

Aim to perform this programme a minimum of once per day unless prescribed otherwise. As with any new exercise, start slowly (repetitions as able) and build up as you are able within the guidelines below. Pain should not exceed 4/10 whilst completing this exercise programme.

15 reps / 2-3 sets / 1 minute rest

1. Bicep curl

- Sit or stand with your hand down by side with the front of your hand facing forward.
- With a small weight in hand (household object if you do not have a weight), bend your elbow to bring your hand up to your shoulder.
- Return to starting position.

15 reps / 2-3 sets / 1 minute rest

2. Wrist flexion with weight

- Sit or stand with your arm straight out in front of you with the palm of your hand facing upward, holding a small weight.
- Bend your wrist so your hand moves towards you.
- Hold this position for 5 seconds.
- Relax your hand back to starting position.

15 reps / 2-3 sets / 1 minute rest

3. Stress ball squeeze

- Hold a soft ball or a balled-up piece of tissue.
- Squeeze the ball tightly holding for 5 seconds.
- Relax your hand and forearm muscles between repetitions.

We recommend consulting a musculoskeletal physiotherapist to ensure exercises are best suited to your recovery. If you are carrying out an exercise regime without consulting a healthcare professional, you do so at your own risk. If you have any concerns whilst completing these exercises, please contact a healthcare professional.
